BALANCES OF BUDGET AUTHORITY Budget for Fiscal Year 2018

Government agencies are permitted to enter into obligations that result in immediate or future outlays only when they have been granted authority to do so by law. This authority is called budget authority. This report presents the balances of budget authority for the end of 2016, 2017 and 2018 as shown in the 2018 Budget.

Budget authority is placed in a budget account and is classified in either the "federal" funds group or the "trust" fund group. Trust funds consist of accounts defined in law as a trust fund. The federal fund balances include all balances that are not required by law to pass through trust funds.

Budget authority moves through stages. When budget authority is first enacted, it is called "new" budget authority. Thereafter, it is called "balances" of budget authority.

- **Unobligated balances** refers to the balances that have not yet been committed by contract or other legally binding action by the government.
- **Obligated balances** refers to the balances where there have been legally binding action (for example, contracts signed) but for which payment has not yet been made but will be required in the future.
- Unexpended balances of budget authority refers to the sum of the unobligated and obligated balances.

At the end of each fiscal year, unobligated balances that are still available for new obligation are carried forward to the start of the next fiscal year. Unobligated balances that are expiring (i.e., are not available for new obligation) are not carried forward to the start of the next fiscal year. By law, obligated balances are either no-year or available to pay old bills normally for five expired years after

which the obligated balances are cancelled. Therefore, the obligated balances that are still available to pay old bills are carried forward to the start of the next fiscal year. This report provides data on the end of year balances that are not expiring and carried forward to the start of the next fiscal year in the following tables:

- TABLE 1. SUMMARY OF UNEXPENDED BALANCES shows total Federal Government obligated and unobligated balances divided between federal funds and trust funds.
- TABLE 2. TOTAL UNEXPENDED BALANCES BY AGENCY shows total obligated and unobligated balances by Department and major agency.
- TABLE 3. FEDERAL FUND OBLIGATED BALANCES, BY AGENCY shows federal fund obligated balances by Department and major agency.
- TABLE 4. FEDERAL FUND UNOBLIGATED BALANCES, BY AGENCY -- shows federal fund unobligated balances by Department and major agency.
- TABLE 5. TRUST FUND OBLIGATED BALANCES, BY MAJOR TRUST FUND shows obligated balances for the larger trust funds.
- TABLE 6. TRUST FUND UNOBLIGATED BALANCES, BY MAJOR TRUST FUND shows unobligated balances for the larger trust funds.
- TABLE 7. TRUST FUND BRIDGET FROM UNEXPENDED BALANCES TO CASH provides a bridge from trust funds' unexpended balances of budget authority to unexpended cash, with a further adjustment for debt outstanding to calculate net position.
- TABLE 8. CREDIT FINANCING ACCOUNTS UNOBLIGATED BALANCES -- shows unobligated balances of credit financing accounts, which are non-budget accounts that record the financing transactions associated with federal lending programs and hold assets to cover estimated losses on direct loans and loan guarantees.
- TABLE 9. UNOBLIGATED BALANCES BY PROGRAM CATEGORIES groups unobligated balances of programs with similar characteristics or purposes.

Total unexpended balances at the end of 2017 to be carried forward to 2018 is estimated to be \$2,353 billion. Of this amount, 61% or \$1,432 billion is estimated to be obligated, and 39% or \$921 billion is estimated to be unobligated.

This \$921 billion in unobligated balances is similar to previous years. To provide more insight on the magnitude and composition of these balances, Table 9 groups unobligated balances into the following major program categories.

- I. Insurance and other financial reserves that account for \$576 billion or 63% of the total;
- II. Programs that require working capital that account for \$33 billion or 4%;
- III. Programs funded by earmarked receipts or dedicated taxes that account for \$59 billion or 6%;
- IV. Prefunding of major appropriated entitlements that account for \$21 billion or 2%;
- V. Programs with long lead times to outlay that account for \$104 billion or 11%; and
- VI. All other programs that account for the remaining \$128 billion.

These categories are explained in more detail below.

- **I. INSURANCE AND OTHER FINANCIAL RESERVES**. This program category accounts for \$576 billion of the total estimated unobligated balances to be carried forward to 2018. The largest percentage of these balances result primarily from the unprecedented and decisive actions taken by the U.S. Government to mitigate damage to the U.S. economy and financial markets in response to the financial crisis of 2008. Of this major program category, 45% is for GSE preferred stock purchase agreements, 46% is for deposit and other insurance programs; 8% is for international financial reserves, and the last 1% is in credit liquidating accounts.
 - a. GSE Preferred Stock Purchase Agreements. These agreements make up \$258 billion of the total unobligated balances. Section 1117 of the Housing and Economic Recovery Act of 2008 (HERA) granted authority for the Treasury to purchase any obligations and other securities issued by Government Sponsored Enterprises (GSEs), specifically Fannie Mae and Freddie Mac. The unobligated balances in the GSE Preferred Stock Agreement (PSPA) account exist in the event that in the future the GSEs need financial support under the PSPAs.
 - **b. Deposit Insurance.** \$107 billion of the unobligated balances are for the Federal Deposit Insurance Corporation (FDIC), the National Credit Union Administration (NCUA) and the Treasury Department's Office of the Comptroller of the Currency (OCC).

The **FDIC** has two accounts with large balances, the Deposit Insurance Fund (DIF) and the FSLIC Resolution Fund (FRF).

- The primary purpose of the DIF is to insure deposits and protect the depositors of failed banking institutions. The FDIC is authorized to charge risk-based premiums on member institutions to restore and maintain adequate DIF reserves, which must be a designated percentage of estimated insured deposits as set by the FDIC before the beginning of each year. The unobligated balance in the DIF is a reserve to resolve failed institutions, if necessary. FDIC, as receiver of the failed institution, must liquidate assets of the failed institution that have declined substantially in value while, at the same time, making good on the institution's deposit obligations.
- The FRF is the ultimate successor to the Federal Savings and Loan Insurance Corporation (FSLIC) assets and liabilities from thrift resolutions prior to August 1989, as well as Resolution Trust Corporation (RTC) that assumed the FSLIC's unresolved cases through December 31, 1995. The FRF will terminate upon the disposition of all of its assets. Any net proceeds will be deposited into the General Fund of the Treasury for net proceeds from the former FSLIC, while any net proceeds from the former RTC will be paid to the Resolution Funding Corporation.

The **National Credit Union Administration** funds its activities through assessments levied on all federally chartered credit unions and through reimbursements from the Share Insurance Fund for its share of administrative activities. The primary purpose of the Share Insurance Fund is to provide insurance for deposits of member accounts (also known as insured member shares) in Federal credit unions and state-chartered credit unions that apply and qualify for insurance as authorized by Public Law 91–468. The unobligated balances are reserves to pay insured members should a credit union fail.

The **Office of the Comptroller of the Currency** (OCC) was created by Congress to charter national banks; oversee a nationwide system of banking institutions; and ensure national banks are safe and sound, competitive and profitable, and capable of serving in the best possible manner the banking needs of their customer. The OCC's funds are derived principally from assessments on national banks and interest on investments in U.S. Government securities and are used to support the OCC's mission to supervise, charter, and regulate banks. The OCC receives no appropriated funds from Congress. Through the Comptroller's authority, the OCC's unobligated funds support the bureau's mission by reducing the possible impact on operations in the event of significant fluctuation in revenues and expenses. These funds also cover foreseeable but rare events or allow the OCC to respond to new requirements or opportunities.

- c. Other Insurance. This category accounts for \$157 billion of the total. It includes:
 - 1. \$67.9 billion for the Office of Personnel Management Employees Life Insurance Fund and Employees and Retired Employees Health Benefits Fund;
 - 2. \$25.9 billion for the Department of Labor's Pension Benefit Guaranty Corporation (PBGC) Fund;
 - 3. \$49.0 billion for the Department of Housing and Urban Development's FHA-mutual Mortgage Insurance Capital Reserve and the Guarantees of Mortgage backed Securities Capital account;
 - 4. \$5.7 billion for the Overseas Private Investment Corporation Non-credit account;
 - 5. \$4.4 billion for the Farm Credit System Insurance Fund;
 - 6. \$2.2 billion for the Department of Transportation's Aviation War Risk insurance funds;
 - 7. \$1.3 billion for the Department of Veterans Affairs' Veterans Special Life, Service Disabled Veterans, Veterans Reopened, and Service members' Group Life Insurance Funds; and
 - 8. \$0.6 billion for the Federal Crop Insurance Corporation Fund.

In the case of the *OPM Employees Life Insurance Fund*, Federal employees (excluding Postal Service), employees of Tribal organizations, and all retirees under age 65 pay two-thirds of the premium costs for basic coverage; agencies and tribal organizations pay the remaining third. Optional and certain post-retirement basic coverage are paid entirely by enrollees. The Employees and Retired Employees Heath Benefits Funds are financed by: 1) withholdings from active employees and annuitants; 2) agency contributions for active employees; 3) Government contributions for annuitants appropriated to OPM; and 4) contributions made by the United States Postal Service in accordance with the provisions of Public Law 101–508. Funds made available to carriers but not used to pay claims in the current period are carried forward as special reserves for use in subsequent periods.

The Pension Benefit Guaranty Corporation is a federal corporation established under the Employee Retirement Income Security Act of 1974, as amended. It guarantees payment of basic pension benefits earned by more than 40 million of America's workers and retirees participating in more than 22,000 private sector defined pension plans. The Corporation receives no funds from general tax revenues. Operations are financed by insurance premiums paid by companies that sponsor defined benefit pension plans, investment income, and assets from terminated plans.

The **Overseas Private Investment Corporation** helps American businesses expand into emerging markets overseas to advance U.S. foreign policy. It operates on a self-sustaining basis at no net cost to American taxpayers. The unobligated balance is a reserve against any future losses.

- d. Credit Liquidating Accounts. These accounts make up \$6 billion of the total unobligated balances. Pursuant to the Federal Credit Reform Act of 1990, the cash flows associated with pre-1992 direct loan obligations and loan guarantee commitments are reported on a cash basis in *liquidating* accounts. Normally at the end of each year, the unobligated balances in credit liquidating accounts are returned to the Treasury because the amounts can only be used to liquidate obligations incurred in the year the amounts are collected. The balances that remain are reserves needed to pay claims should there be a default on a loan that was guaranteed before the end of 1991.
- e. International Financial Reserves. International Monetary programs, the Exchange Stabilization Fund, and the Contribution to the International Bank for Reconstruction and Development (IBNR) account for about \$47 billion of the unobligated balances.

International Monetary Programs.

The Budget records budget authority and outlays equal to the estimated present value, including the fair value adjustment to the discount rate, in the year that an increase in the U.S. quota at the International Monetary Fund is enacted, i.e., 2016. All concurrent and subsequent transactions between the Treasury and the IMF are treated as a non-budgetary means of financing, which do not directly affect receipts, outlays, or deficits. The only exception is that interest earnings on U.S. deposits in its IMF account are recorded as offsetting receipts. The Budget Appendix shows supplementary "below-the-lines" information about dollar value of the IMF quota, divided between the portion that is held in a Treasury letter of credit and the amount deposited in the U.S. reserve tranche at the IMF, and the NAB. The actual amounts are updated in the Budget to reflect changes in the dollar value of Special Drawing Rights that serve as the unit of measure for countries' level of participation.

Exchange Stabilization Fund. Special Drawing Rights (SDRs) assets appear as unobligated balances in the Exchange Stabilization Fund (ESF). These SDRs can be used either in transactions with the IMF, other members of the IMF, or for the purposes of the ESF set forth in the ESF statutory authorization. The Secretary of the Treasury is authorized to use the ESF assets – SDR, dollar and foreign currency assets – consistent with U.S. obligations in the IMF on orderly exchange arrangements and a stable system of exchange rates. The principal sources of the ESF's income have been SDR allocations, unrealized gains on foreign exchange investments, interest on operations with foreign countries, and interest on investments held by the ESF.

Contribution to the International Bank for Reconstruction and Development (IBRD). The unobligated balance reflects reserves that are intended to be obligated and outlayed in the event of insolvency of the World Bank and the need to meet obligations for funds borrowed or on loans guaranteed on it.

- II. PROGRAMS THAT REQUIRE WORKING CAPITAL. This category accounts for \$33 billion of the total estimated unobligated balances to be carried forward to 2018. It is made up of the public enterprise revolving funds and the intragovernmental revolving funds that collect payments from the public or Federal government accounts in return for providing goods and services. These accounts need working capital to produce the goods and services to sell to customers who will then reimburse the accounts. The unobligated balances are necessary to allow this cycle of operations to continue.
- III. PROGRAMS FUNDED BY EARMARKED RECEIPTS OR DEDICATED TAXES. This category accounts for \$59 billion of the total estimated unobligated balances to be carried forward to 2018. The following make up 83% of these balances:
 - \$38 billion are in the Department of Transportation. Of this amount \$24 billion is in the Federal-aid Highways account and \$12 billion is in the Federal Transit Administration's Formula Grants account. The unobligated balances in these and other surface transportation accounts are not cash balances. Rather, they are balances of contract authority, which is authority to obligate the Federal government to eventually pay cash derived from either the gas taxes collected or taxpayer dollars from the general fund of the Treasury. A primary reason for the level of unobligated balances is that the vast majority of the spending for the Trust Fund accounts is contract authority capped by annual or multi-year obligation limitations. These limitations have typically been imposed by the appropriations committees and serve to limit the amount of obligations that can be incurred in either a single or multiple years. In prior years, the annual Federal Aid Highways obligation limitation has been set lower than the annual contract authority level (resulting in balances of contract authority in excess of the obligation limitation), while the Federal Transit Administration levels have been set to equal the contract authority level and unobligated transit limitation carries forward exempt from the current year limitation. Both these dynamics result in higher than expected unobligated balances, for both Federal-aid Highways and the Transit Formula grants. In addition to the surface transportation program balances, there are approximately \$1 billion in unobligated balances in the Federal Aviation Administration (FAA) facilities and equipment account that are due to the time required to develop and build capital projects for FAA infrastructure.
 - \$3.5 billion is in the Environmental Protection Agency's Hazardous Substance Superfund;
 - \$1.5 billion is in the Judicial Branch, most of which is for Judicial Officers' Retirement and Judicial Survivors' Annuities;
 - \$1.5 billion is in the Department of Homeland Security's National Flood Insurance Reserve Fund;

- \$0.99 billion is in the Department of Defense's Host Nation Support Fund for Relocation;
- \$0.87 billion is in the Department of Defense's Allied Contributions and Cooperation Account;
- \$0.83 billion is in the Federal Communications Commission's TV Broadcaster Relocation Fund;
- \$0.83 billion is in the Department of the Treasury's Treasury Forfeiture Fund; and
- \$0.81 billion is in the Department of the Treasury's Gulf Coast Restoration Trust Fund.
- **IV. PREFUNDING OF MAJOR APPROPRIATED ENTITLEMENTS**. This category accounts for \$21 billion of the total estimated unobligated balances to be carried forward to 2018. Appropriations for these programs are based on estimates of demand. Congress then frequently appropriates a small cushion of funding above estimated demand to eliminate the need for agencies to ask for supplemental appropriations during the year when actual program need exceeds the estimated demand. This \$21 billion of unobligated balances is comprised of:
 - a. \$7 billion for the Department of Agriculture's Supplemental Nutrition Assistance Program and Child Nutrition Programs;
 - b. \$4 billion for the Social Security Administration's Supplemental Security Income Program;
 - c. \$9 billion for the Department of Veterans Affairs' Compensation and Pensions Program; and
 - d. \$1 billion for the Department of Labor's Special Benefits Program.
- V. PROGRAMS WITH LONG LEAD TIMES TO OUTLAY. This category accounts for \$104 billion of the total estimated unobligated balances to be carried forward to 2018. These balances result from a fundamental budget principle that each Congress should fund the full cost of projects that it authorizes agencies to enter into. Because construction, major procurement, and research and development projects can take years to complete, the full-funding requirement means that agencies will hold unobligated balances to cover obligations incurred over the life of the project. The alternative providing partial funding to cover only work performed during each fiscal year would lead to procurement inefficiencies and force future Congresses to pay for the sunk costs incurred by past Congresses. Table 9 shows accounts with these unobligated balances grouped by account. An Excel file available at www.budget.gov also provides a detailed list of accounts.
- VI. All OTHER PROGRAMS. This category accounts for the remaining \$128 billion in estimated unobligated balances to be carried over to 2018. Table 9 groups these amounts into Defense and Non-defense functions. An Excel file available at www.budget.gov also provides a detailed list of accounts in this category.

TABLE 1. SUMMARY OF UNEXPENDED END-OF-YEAR BALANCES, FY 2018 BUDGET (In millions of dollars)

| | 2016 | 2017 | 2018 |
|--|----------------------|------------|-----------|
